FFG Career Opportunity

Fantasy Flight Games (FFG), is a leading hobby-market publisher of board games, card games, roleplaying games, and other tabletop games. FFG's diverse products include games based on bestselling novels, computer and hobby game properties, movie, and TV properties, as well as FFG's own proprietary universes.

POSITION: Application Developer (AAD)
Fantasy Flight Games
Roseville, MN, United States

SUMMARY:

The Application Developer position will create and troubleshoot computer code with aim to produce and support digital games and utility applications for digital devices.

RESPONSIBILITIES:
- Work with team to develop software application solutions using the Unity3D SDK.
- Learn and maintain existing code and provide support and updates to existing and future applications.
- Manage and work with groups of testers.
- Handle feedback and bugs in an organized manner to improve the quality of software.
- Work closely with interactive team to extensively test own software and code and ensure each project reaches its full potential while also staying with deadlines.
- Communicate directly with customers and answer technical support questions.
- Work with customers to track down bugs and maintain a bug list based on cutover feedback and problems.
- Maintain good and frequent communication with other members of the Interactive team and with other departments.
POSITION SKILLS & QUALIFICATIONS:
- Excellent written and verbal communication skills
- Product knowledge is preferred; not required.
- Strong proficiency with C# and .NET frameworks.
- Understand real-time 3D computer graphics terminology ad related concepts.
- Familiar with Unity3D game engine.
- Graphics/shader programming.
- Multiplayer and/or network programming.
- Modern web technologies (HTML5, JQuery, Backbone.js, GWT)
- Strong organizational and multitasking skills.
- Able to be self-motivated and work independently on projects.
- Detail oriented and dedicated to making great software.
- Ability to collaborate effectively with other teams and individuals
- Able to travel up to 10% of the time; sometimes with very little notice.

EDUCATION REQUIREMENTS:

- Minimum of Bachelor's of Science degree or equivalent work experience.
- Native Android and/or iOS development experience.
- Experience with OOP code design principles.
- Artificial Intelligence (AI) Programming.

BENEFITS:

Medical, dental, company-paid basic life insurance, flexible spending account, IRA plan with company match, PTO, and an annual product allowance.
